**Press Release on August 13, 2004**

**HKU POP SITE and Civic Exchange releases the 4<sup>th</sup> Legislative Council election rolling survey result**

**Preamble**

This year, the Public Opinion Programme (POP) at the University of Hong Kong and the Civic Exchange are jointly conducting a series of rolling surveys on the 2004 Legislative Council direct elections starting from August 4. While the background and the methodology have been discussed before, please refer to the websites of POP and Civic Exchange at <http://hkupop.hku.hk> and <http://www.civic-exchange.org> respectively for the details. This press release mainly highlights the key findings in the rolling surveys conducted from August 7 to 11.

**Knowledge of the election**

The latest territory-wide rolling surveys (i.e. August 9 to 11) revealed that, 49% of the voters interviewed had no idea on any list in their geographical constituency, while 52% knew at least one list. For the scenarios in individual constituencies, please refer to the websites for details.

Territory-wide rolling surveys							
Date of survey	<u>4-6/8</u>	<u>5-7/8</u>	<u>6-8/8</u>	<u>7-9/8</u>	<u>8-10/8</u>	<u>9-11/8</u>	<u>Latest change</u>
Sample base	1,120	1,108	1,072	1,064	1,069	<b>1,099</b>	--
Overall response rate	72.7%	73.9%	74.5%	73.9%	74.4%	<b>75.0%</b>	--
Sampling error of percentages (at 95% conf. level)*	+/- 3%	+/- 3%	+/- 3%	+/- 3%	+/- 3%	+/- 3%	--
Totally no idea on the list in their constituency	59%	55%	55%	52%	51%	<b>49%</b>	<b>-2%</b>
Knew at least one list in their constituency ^	41%	45%	45%	48%	49%	<b>52%</b>	<b>+3%</b>
Knew at least half of the lists in their constituency ^	11%	13%	14%	16%	17%	<b>18%</b>	<b>+1%</b>
Knew all lists in their constituency ^	1%	1%	1%	1%	1%	<b>1%</b>	--

\* "95% confidence level" means that if we were to repeat a certain survey 100 times, using the same questions each time but with different random samples, we would expect 95 times getting a figure within the error margins specified.

^ Since overlapping exists among these 3 answers, the total would add up to over 100%.

## Propensity to vote

The territory-wide rolling surveys from August 9 to 11 revealed that, the registered voters' propensity to vote was 84%. Nevertheless, this percentage should never be taken as a projection of the actual turnout rate because many people who claimed they would vote at this stage would eventually not vote. For the scenarios in individual constituencies, please refer to the websites for details.

## Stray voters

Since many voters still had not decided how to cast their vote, while stray voters would always have significant influence on the election result, the POP Team therefore further look into the distribution of these votes in 5 constituencies. Firm voters are defined as those who said they would definitely and most likely vote, and have also decided to vote for which list, while stray voters are defined as those who said they would definitely and most likely vote, but have not decided to vote for which list. The rolling surveys in individual constituencies from August 7 to 11 showed that, there were around 24% - 34% of stray votes in each of the 5 constituencies, while the largest proportion of stray votes was found in Kowloon East (34%) and the smallest in New Territories East (24%). The figures are summarized as follows:

Rolling survey: Hong Kong Island

^Included responses of "Won't vote" and "Won't support any political parties or candidates".

The support ratings shown above have not excluded those who had not decided and claimed not to vote. Readers may exclude this group of uncertain voters (assuming that they would not vote at all), reallocate the vote share according to the new base. The number of seats obtained by each list can then be deduced based on the Largest Remainder Formula. Yet, one must take note of the sampling errors. Please refer to the websites for the exact phrasing and wordings adopted.

It must be stated that since many voters have not yet made their choice, while most candidates have not started their full-scale election campaign, the influence of these stray votes is yet to be seen. For the results of other rolling surveys, please refer to the websites for detailed figures and updates.

### **Other points to note**

POP will release the latest results of the rolling surveys every day at 2 pm via our POP Site. Shall anyone have any question regarding the research design of the surveys published in the POP Site, members of the POP Team will be happy to answer them, but we will not further comment on the findings. Shall any person or journalist have any other questions, please email them to us at <[pop.network@hkupop.hku.hk](mailto:pop.network@hkupop.hku.hk)>.
