Press Release on September 10, 2004

HKU POP SITE and Civic Exchange releases the 32nd Legislative Council election rolling survey result

Preamble

This year, the Public Opinion Programme (POP) at the University of Hong Kong and the Civic Exchange are jointly conducting a series of rolling surveys on the 2004 Legislative Council direct elections starting from August 4. While the background and the methodology have been discussed before, please refer to the websites of POP and Civic Exchange at <http://hkupop.hku.hk> and <http://www.civic-exchange.org> respectively for the details. This press release mainly highlights the key findings in the rolling surveys conducted from September 4 to 8, previous findings dating back to August 4 are available in the websites mentioned.

Propensity to vote

The territory-wide rolling surveys from September 6 to 8 revealed that, the registered voters' propensity to vote was 85%. Nevertheless, this percentage should never be taken as a projection of the actual turnout rate because many people who claimed they would vote at this stage would eventually not vote. For the scenarios in individual constituencies, please refer to the websites for details.

Proportion of respondents definitely will vote	59%	59%	59%	60%	60%	59%	-1%
Propensity to vote (summation of "definitely will" and "most likely will" vote)	83%	83%	82%	83%	84%	85%	+1%

* "95% confidence level" means that if we were to repeat a certain survey 100 times, using the same questions each time but with different random samples, we would expect 95 times getting a figure within the error margins specified.

Stray voters

Since many voters still had not decided how to cast their vote, while stray voters would always have significant influence on the election result, the POP Team therefore further look into the distribution of these votes in 5 constituencies. Firm voters are defined as those who said they would definitely and most likely vote, and have also decided to vote for which list, while stray voters are defined as those who said they would definitely and most likely vote, but have not decided to vote for which list. The rolling surveys in individual constituencies from September 4 to 8 showed that, there were around 20-31% of stray votes in each of the 5 constituencies, while the largest proportion of stray votes was found in New Territories West (31%) and the smallest in Kowloon West (20%). The figures are summarized as follows:

*Calculated at "95% confidence level" which means if we were to repeat a certain survey 100 times, using the same questions each time but with different random samples, we would expect 95 times getting a figure within the error margins specified.

** Since the support rating was less than 5%, the proportion of firm votes was not listed here due to the small base.

[^]Included responses of "Won't vote" and "Won't support any political parties or candidates".

^{^^} The proportion of respondents who said they "would definitely vote" among all supporters of that particular list.

The support ratings shown above have not excluded those who had not decided and claimed not to vote. Readers may exclude this group of uncertain voters (assuming that they would not vote at all), reallocate the vote share according to the new base. The number of seats obtained by each list can then be deduced based on the Largest Remainder Formula. Yet, one must take note of the sampling errors. For the other rolling surveys' result, survey method, contact information, respondents' demographics and full questionnaires, please refer to the websites for detailed information.

Other points to note

POP will release the latest results of the rolling surveys every day at 2 pm via our POP Site. Shall anyone have any question regarding the research design of the surveys published in the POP Site, members of

the POP Team will be happy to answer them, but we will not further comment on the findings. Shall any person or journalist have any other questions, please email them to us at <pop.network@hkupop.hku.hk>. Please note that everything carried in the POP Site does not represent the stand of the University of Hong Kong. Dr Robert Ting-Yiu Chung, Director of Public Opinion Programme, is responsible for everything posted herewith, except for column articles which represent the stand of their authors.
